Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-46, 91-93 and 97-105, drawn to a brewing apparatus, classified in class 99, subclass 280.
- II. Claims 47-90 and 94-96, drawn to a method of brewing, classified in class 426, subclass 433.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus, such as one without a controller.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with James Potthast on January 25, 2005 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-46, 91-93 and 97-105. Affirmation of this election must be made by applicant in replying to this Office action. Claims 47-90 and 94-96 are withdrawn from further

Art Unit: 1761

consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-46, 91-93 and 97-105 are rejected under 35 U.S.C. 102(e) as being anticipated by McIntyre et al.

Art Unit: 1761

There is disclosed in McIntyre an operator control panel 13 with a plurality of hidden function selection switches 12A, 12B (col. 5, lines 20-27) and 12D (message display) associated with a plurality of different operator selectable functions; means 13A for pre-selecting different modes of operation, including means 16 responsive to actuation of at least one of the other function switches to program a controller; and a controller 15 with means 12 for selectively revealing only pre-selected ones of the hidden function switches to an operator in accordance with the different pre-selected modes of operation.

Applicants recitation of a beverage brewer or food processing apparatus in the claims is without structure to support such a use for the device. Without any defined structure to limit the device to beverage brewing or food processing the claims read on a display and display control for any type of device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Silva et al. and Kamper t al. are cited for their disclosure of the claimed control panel. The patent to Burke et al. is cited for its disclosure of a control panel on a beverage brewer.
